Experience

Wegmans Pharmacy

June 2022 to Current

Pharmacy Technician

- Operated pharmacy software to input patient information and prescription data
- Ensured compliance with safety regulations, pharmacy best practices, and local laws
- Resolved customer complaints in a timely manner while maintaining professionalism at all times.
- Trained new staff on pharmacy procedures and customer service standards

Alternative Information Systems

November 2019 to March 2020

Intern

- Collaborated with senior technicians to resolve clients' IT tickets
- Troubleshoot and repaired laptop hardware
- Built desktop computers

Projects

Nutrition / Meal Planning website (HTML, JavaScript/React, CSS, PHP, Git) - School Project

- Designed and developed a full-stack web application
- Designed concept flow using Figma
- Worked in a 5-person agile team under a Project Manager
- Called fatsecret API for recipe and ingredient searches
- Utilized Git for version control

Recipe Review Analyzer (Python) - School Project

- Determined whether a review was positive or negative based on the content with 97% accuracy
- Used machine learning techniques (data pre-processing, model training)
- Evaluated results using confusion matrix and associated metrics

Golf Game (Java/React) - In Progress

- Developed a 2D game featuring club selection, shot distance calculation, and scoring
- Object-oriented design using classes and enums to represent courses, holes, clubs, and players

Education

University At Buffalo

Bachelor of Science: Computer Science
